SUMMARY

Electronics and Telecommunication Engineering student at RUET with hands-on experience in full-stack web development, software engineering, and IoT systems. Proficient in React.js, JavaScript, Supabase, C++, Python, MySQL, and Git/GitHub, with experience building scalable web applications including legal consultation platforms, academic result management systems, and healthcare management solutions. Skilled in database design, authentication systems, real-time communication, and responsive UI development. Strong problem-solving abilities with a proven track record of delivering both individual and team-based projects. Seeking software engineering or web development internship opportunities to apply technical expertise and contribute to impactful technology solutions.

EDUCATION

Rajshahi University of Engineering & Technology

B.Sc.Engg. in Electronics & Telecommunication Engineering

Rajshahi

Aug 2023 – Present

Notre Dame College

Higher Secondary Certificate

Dhaka

2022

St. Joseph's School & College

Secondary School Certificate

Bonpara, Natore

2020

EXPERIENCE

Product Development Engineer

Ukil Chamber – Legal Consultation Platform

February 2026 - Present

React.js, Supabase, JavaScript

- Designed and developed a full-stack web application connecting clients with lawyers through appointment booking and real-time communication.
- Engineered role-based authentication, scheduling, availability management, and secure document sharing using Supabase services.
- Optimized the application with a responsive React frontend, PostgreSQL database, and real-time synchronization for an improved user experience.

Intern - Web Development

CodeAlpha, Lucknow, UP, India

June 2026 - Present

Remote

- Selected for a 3-month Web Development Internship focused on front-end and back-end web technologies.
- Expected to work on real-world web development projects and gain hands-on experience in software development practices.

Front-end AI Engineer - Internship

FlyRank AI, Chicago, Illinois

July 2026 - Present

Remote

- Use modern frameworks, Tailwind, and template languages to structure pages, sections, and reusable blocks.
- Build layouts that match the design direction, work on mobile, and avoid the common spacing and overflow issues.
- Practice simple Shopline and Shopify-style pages: product cards, collections, detail sections, trust blocks, and CTAs.
- Prompt for code, debug with AI, then verify responsiveness, accessibility basics, and pixel-perfect details yourself.

TECHNICAL SKILLS

Programming Languages: Python, C, C++, HTML, CSS, React, MySQL, MATLAB

Libraries & Tools: NumPy, Git, Github, VS Code, Supabase

Relevant Coursework: Database Management System, Data Structure & Algorithm, Object Oriented Programming, System Design

Areas of Interests: Web Design & Development, Backend Development, Electronics Design and Implementation

Soft Skills: Problem Solving, Self Learning, Presentation, Teamwork & Team Lead, Communication, Attention to Detail

PROJECTS

Ukil Chamber - Online Legal Consultation Platform

2025

Full Stack Web Application

React.js, Node.js, Supabase

- Engineered a full-stack legal consultation platform enabling secure interaction between clients and lawyers
- Developed features including lawyer discovery, consultation booking, and real-time messaging
- Integrated Supabase Authentication, Database, and Realtime services to ensure secure and efficient communication
- Created a responsive and user-friendly interface using React, improving accessibility across desktop and mobile devices

RUET Medical Portal

Ongoing

Independent Full Stack Project

React.js, Node.js, Supabase

- Designing and developing a web-based healthcare platform to streamline medical services for RUET students and staff
- Implementing online appointment booking, doctor schedules, patient records, and health service information modules
- Developing secure authentication and role-based access control for patients, medical personnel, and administrators
- Building a responsive and scalable architecture to improve accessibility and efficiency of campus healthcare services

Result Management System

2026

Academic Group Full Stack Project

React.js, Supabase, JavaScript

- Collaborated in a team to develop a comprehensive academic result management system with dedicated student, teacher, and administrator portals
- Implemented course registration, marks entry, result processing, and semester-wise transcript generation functionalities
- Integrated Supabase for authentication, database management, and secure handling of academic records
- Developed complaint management, result viewing, and report export features to streamline academic administration

DriveSafe-Intelligent-Vehicle-Safety-and-Tracking-System

Nov 2025

IOT Based Project

Arduino IDE Language

- Detects collisions via SW-420, tracks location with GPS
- Sends alerts through GSM, email, and Telegram
- Enables real-time monitoring with ESP32-CAM and autonomous obstacle avoidance for enhanced safety

2D Car Game

Apr 2025

Simple Mobile Game

Python, Pygame

- Built using Python and Pygame, the project includes visual assets, background music, and game logic
- Allows users to control the car using keyboard inputs, enabling real-time movement and interactive gameplay
- Generates obstacles and detects collisions between the player's car and obstacles, triggering game-over conditions and making gameplay challenging.

Rock Paper Scissor Game

Oct 2024

Simple Game

C++

- Developed a simple string-based Rock Paper Scissors game using basic C++
- Implemented core game logic using conditional statements (if-else)

Attendance Tracking System

Oct 2024

Tuition Attendance System

C++

- Designed and implemented an attendance recording system using C++
- Previously maintained in Excel, this version leverages object-oriented programming principles and enhances data management efficiency

CERTIFICATIONS

- Financial Inclusion: Engaging and Inspiring Youth in Banking
- Aptis for Teens - Preparation Course
- CSE/ECE/ETE Job Sector after Engineering
- DriveSafe: Intelligent Vehicle Safety and Tracking System
- Safer Internet for Children

EXTRA Co-CURRICULAR ACTIVITIES

- Graphics Design Team Lead - Notre Dame College Association of RUET
- Logistics Team Lead - Notre Dame College Association of RUET
- Assistant Organizing Secretary - Notre Dame College Association of RUET
- Former IT Lead - Tarunner Proyas, Bonpara, Natore (A new Local Voluntary Organization)
- Former Campus Ambassador - Trimatrik Rosikota
- Former Executive Member - Photographic Society of RUET
- Former Member - Notre Dame English Club
